Industrial Diamond Review

VOLUME 30 JANUARY to DECEMBER 1970 Nos. 350 to 361

Key to page numbers

No. 350	January	pp 1- 29	No. 354	May	pp 167-193	No. 358	September	pp 341-365
No. 351	February	pp 43- 71	No. 355	June	pp 209-232	No. 359	October	pp 383-405
No. 352	March	pp 87-110	No. 356	July	pp 251-275	No. 360	November	pp 427-456
No. 353	April	pp 125-152	No. 357	August	pp 295-320	No. 361	December	pp 471-497

AUTHORS' INDEX

A

Amrhein, H. G.
Electrolytic grinding—one method for the optimum solution of machining jobs, 64

B

Büttner, A. O. K., Bullen, G.
The functional hardness of diamond wheels, 492

Bullen, G., *see* **Büttner, A. O. K., Bullen, G.**

Busch, D. M.
Machine vibrations and their effects on the diamond wheel, 447

C

Chepovetskii, I. Kh., *see* **Vichnevskii, A. S., Delevi, V. G., Nelipovich, P. V., Chepovetskii, I. Kh.**

D

Daniel, P.
Diamonds return to Charterhouse Street, 22
Diamonds aid the development of mini-radars—new, cheap tools for industry, 126
The diamond grinding of steel—some early approaches, 171
Modern spheres of industry, 224
New De Beers grit proves its worth in production, 311
Stop-go—last longer, 484

Delevi, V. G. *see* **Vichnevskii, A. S., Delevi, V. G., Nelipovich, P. V., Chepovetskii, I. Kh.**

Dyer, H. B.
Grinding with diamond abrasives. Part 1—steel, 2
An appraisal of diamond as a steel grinding abrasive, 430

F

Fynn, G. W., Powell, W. J. A.
Low speed i.d. sawing of damage-prone electronic materials, 312

H

Haasis, G.
What's new in diamond honing, 91

Hamada, Y., Kosugi, K.
Japanese manufacturers cut costs in ferrite grinding, 346

Hanle, E.
High finishes and close tolerances in electronics manufacturing, 17

Herbert, S.
Surface set blades halve stone sawing costs, 271

Holz, R.
Diamond tools in the sheet and hollow glass industry, 213

Hughes, F.
Grinding with diamond abrasives: Part 2—tungsten carbide, 47
Volumetric removal rates—changing fiction to fact, 362
How to obtain lowest costs in the wet surface grinding of tungsten carbide, 398

Hush, J. S.
Twopence change from diamond, 44
Jumbo drill helps prepare Manchester Airport for Jumbo Jets, 88
All quiet at the Royal Lancaster, 138
Practising what they preach, 168
Drillers choose their diamonds for glass and concrete, 210
Shop know-how boosts wheel life in ceramic grinding, 296
264,000 to 1 on diamonds at Fords, 342
Glass engraving made easier, 359
Yorkshire quarrymen rely on diamond, 384
New bearing design attenuates grinding vibration, 428
The case of the clean-cut curling stone, 440
Plunge grinding pays off, 472

K

Kolesnichenko, N. F. *see* **Shulman, P. A., Kolesnichenko, N. F., Kostetskii, B. I.**

Kostetskii, B. I. *see* **Shulman, P. A., Kolesnichenko, N. F., Kostetskii, B. I.**

Kosugi, K. *see* **Hamada, Y., Kosugi, K.**

L

Leist, T. H., Lemon, J. R.
Practical methods to obtain improved grinding machine stability, 129

Lemon, J. R. *see* **Leist, T. H., Lemon, J. R.**

M

Miller, R. F., Punglia, J.
A single-stage replica technique for electron microscopy of micro-diamond surfaces, 402

Mueller, J. A. *see* **Stein, H. A., Mueller, J. A.**

Murphy, R. J., Ritter, G. J.
Laser induced fracture and graphitization of diamond, 143

Murphy, R., Ritter, G. J.
The interaction of laser and electron beams with diamond surfaces, 174

N

Nelipovich, P. V. *see* **Vichnevskii, A. S., Delevi, V. G., Nelipovich, P. V., Chepovetskii, I. Kh.**

P

Phillips, D. M. *see* **Scott, A. C., Phillips, D. M.**

Powell, W. J. A. *see* **Fynn, G. W., Powell, W. J. A.**

Primak, L. P., Skripko, G. F.
The contact temperature in the surface grinding of high alumina ceramics, 318

Punglia, J. *see* **Miller, R. F., Punglia, J.**

R

Real, F. A.
De Beers SDA—a superior diamond abrasive, 478

Rainier, D. M.
How gem diamonds are fashioned, 350

Ritter, G. J. *see* **Murphy, R. J., Ritter, G. T.**

Rosengren, K. J.
Diamond drilling for structural purposes at Mount Isa, 388

S

Scott, A. C., Phillips, D. M.
Diamond drilling in the Channel Tunnel survey, 99

Shulman, P. A., Kolesnichenko, N. F., Kostetskii, B. I.
Surfactant coolant additives increase diamond grinding productivity, 228

Skripko, G. F. *see* **Primak, L. P., Skripko, G. F.**

Spray, K. J.
How to prepare relief-free polished surfaces of geological or refractory specimens, 182

Stein, H. A., Mueller, J. A.
The evaluation of metal-bonded diamond wheels for grinding non-metallics, 26

T

Town, H. C.
Some notes on diamond turning and boring, 299

U

Uzanas, R. A.
Emulsion stabilised diamond slurries—a progress report, 188

V

Verbeeth, J.
Rotterdam's Euromast gains new heights, 454

Vichnevskii, A. S., Delevi, V. G., Nelipovich, P. V., Chepovetskii, I. Kh.
Electron probe microanalysis of metal build-up on diamond grits, 456

Vickerstaff, T. J.
Diamond dressing—its effect on work surface roughness, 260

W

Weinz, E. A.
The diamond machining of alumina thread guides, 306

Y

Yarnitsky, Y.
Mechanical methods for achieving the desired surface texture of diamond polishing scaifes, 230

filter, electroplating, 270
portable test, diamond wheel, 317
Using diamond in motor car production, 344
wheels, 345

V
Vertical holes in dry diamond drilling, 71
Vibration
absorber, tuned, 133
dampers for reduction of chatter vibrations, 451
diamond grinding wheel affecting
finish of workpiece, 428, 429
life, 428, 429
stock removal rates, 428, 429
excitation in machine system, reduction of chatter vibrations, 451
grinding machine
amplitude, 134
chatter, 135
classification, 129
forced source, 134
self-excited, 135
Vibrations
chatter
affecting
surface quality of workpiece, 448
waviness of grinding wheel, 448
amplitude, 448
causes, 447
effect, 448
forced, 447, 448
reduction, 450
frequency, 449
reduction
grinding, 450, 451, 452
alteration of conditions, 450, 451
design of machine, 452
wheel
modification in rigidity, 451
selection, 451
vibration
dampers, 451
excitation in machine system, 451
research, 492
self-excited, 447, 448
reduction, 450
source, 447, 448
elimination in diamond boring by corrective design, 304
machine affecting diamond grinding wheel, 447, 448, 449, 450, 451, 452, 453
Volumetric removal rates, 362, 363

W
Wafer, diamond slicing gallium arsenide, 128
Walls, diamond drilling
borehole examination, 394
concrete, noise, 138, 139
Water cooling diamond saw
circular, 385
frame, 385
Waviness of grinding wheel, effect of chatter vibrations, 448
Weakness, causes in grinding machine, 132
Wear
diamond tool in diamond grinding steel, 3
properties of diamond grain in diamond honing, 95
reisitant coatings, diamond
grinding
finishing machine, 168, 169, 170
impregnated wheels, 170
lapping, 170
finishing machine, 168, 169, 170
wheel in diamond plunge grinding, 472
Welded Stellite parts, electrolytic deep grinding, 67
Wet grinding
diamond of carbide steel combinations, 432
surface, 362
crossfeed, 362
diamond of tungsten carbide, 398, 399
cost
time, 398
wheel, 398
results, 398
test parameters, 398
downfeed, 362
table traverse speed, 362
Wheel
bond type influencing grinding ceramics, 318, 319, 320
cost of diamond wet surface grinding tungsten carbide, 398
diamond, 349
application
methods, 275
techniques, 275
bond
flexible, 487
grade, 493
bonded
metal, 490
resin, 490
grinding Ferro-Tic C, 476, 477
dressing, 262
cutting costs with coolant, 297
effects, 264
functional hardness, 492, 493, 494, 495
grinding
ceramics, boosting life, 296, 297, 298
dry, 349
effect of machine vibrations, 447, 448, 449, 450, 451, 452, 453
efficiency, 129
grinding tungsten carbide
parts, 396, 397
tools, 396, 397
impregnated
grinding tungsten carbide, 474
sharpening tungsten carbide blades, 491
wear resistant coatings, 170
metal-bonded for evaluation
grinding non-metallics, 26, 27, 28, 29
test procedure, 26, 27, 28, 29
vibration affecting
finish of workpiece, 428, 429
life, 428, 429
stock removal rate, 428, 429
hub stiffness, 492, 493
influencing grinding machine stability, 137
portable test unit, 317
preparing building materials specimens, 63
profile truing, 220
profiling machine, 227
rim width, 493
segmented cup, 404
used for motor car production, 345
dressing equipment, 21, 490
edge breakdown in diamond dressing, 267
—forming
attachment
bearings, 401
spindle, 401
systems, 317
grinding, chatter vibrations
reduction
modification of rigidity, 451
selection, 451
waviness, effect, 448
speed affecting diamond grinding of tungsten carbide, 59
synthetic diamond abrasive, 472
wear in diamond plunge grinding, 472
Width
bond face affecting diamond grinding of tungsten carbide, 59
rim of diamond wheel, 493
Windows, diamond edging of car, 221
Wires, tungsten for abrasive cutting with oil-based slurry and diamond particles, 63
Work
centre of diamond turning lathe, 300
holding methods in diamond boring, 304
surface roughness affected by diamond dressing, 260, 261, 262, 263, 264, 265, 266, 267
Working with diamond grit
cost, 49
surface finish, 50, 51, 52, 53, 54
Workpiece
finish affected by vibration of diamond grinding wheel, 428, 429
geometry in diamond dressing, 262
steel, study of diamond grinding, 7
surface quality affected by chatter vibrations, 448
tungsten carbide, diamond grinding, 2
World diamond manufacturing plant, inauguration, 252, 253, 254, 255

Industrial Diamond Abstracts

Index January-December 1970

Authors' Index 2

Trade Name and Company Index 8

Key to Abstract Numbers 12

Industrial Diamond Abstracts

VOLUME 30 JANUARY to DECEMBER Nos. 350 to 361

General Notes: (1) individuals, societies, and institutions appear in the first part of the index, whilst commercial companies and trade names are listed in the second part. (2) Lists of new patents (section W) are not included. (3) Patentees from patent abstracts are indicated by an asterisk. (4) Abbreviated words *eg* St for Saint, Mc for Mac, appear in the alphabetical order of the full version. (5) Numbers given are abstract numbers: in order to locate in which issue a given abstract may be found a key is appended. (6) Abstract numbers in brackets are of 'internal' references, *ie* they are not authors of the articles or patents but are referred to in the text.
